

# experience CLUB

In Experience Club, your child will explore a new topic each day through hands-on activities, art, STEAM experiments and team games.

## GROUP WARM UP

Your child will warm up the brain and body with a “big curious (sometimes silly) question.” Your child’s curiosity will be ignited as they share ideas and opinions with their friends. Then, everyone will participate in a collaborative team-building game that will get them working together and building strong friendships.

## TEAM CHALLENGE

This high-energy game will have your child running, laughing and leaping over obstacles.

## ART STUDIO

Your child will turn up their creative juices with new art tools and materials to create artistic masterpieces.

## STEAM STATION

STEAM stands for Science, Engineering, Technology, Art and Math. New projects every day will inspire genius level thinking as your child tinkers, tests, and invents new ideas that will blow your mind!

This year your child will discover a world of curiosity through these monthly themes. Check out this year’s adventures!
